

MAYOR'S MESSAGE

As we approach this holiday season, I want to extend my warmest wishes to each of you. Christmas is a time of love, togetherness, and hope. It reminds us to cherish our loved ones, embrace kindness, and reflect on the true spirit of giving.

As I reflect on the past year, I'm particularly grateful to city staff who have overseen some major changes this year. We've transitioned to a private waste collection service (in less than two years since receiving notice that Logan city would no longer be willing to provide garbage hauling, no less); begun adjusting to the massive overhaul in the development/subdivision process mandated by the legislature via SB174; and, overseen the long-overdue construction of new city offices. We're grateful for staff working tirelessly to make those things happen. We're also particularly thankful for our police, fire, and public utility workers who make sure we have a safe, well-run city with clear roads, beautiful parks, and clean water. We're also so appreciative of the countless volunteers who serve on boards and committees that make our city top-notch. Without good people donating their time, we wouldn't have the spectacular Pumpkin Walk, well-coached recreation programs, robust senior programming, or wonderful library activities.

May this Christmas be filled with peace, happiness, and goodwill for you and your loved ones, and may you be blessed in your service to others.

-Mayor Lyndsay Peterson

NEW NORTH LOGAN LIBRARY DIRECTOR

Please join us in giving a warm North Logan welcome to our new Library Director, Trenton Bateman!

Trent grew up in the small town of Cody, Wyoming where he raised ewes with his family, along with pigs and horses. Trent was a member of 4-H and would enter his prize-winning pigs in the county fair. He enjoyed the beautiful outdoors there and did a lot of hiking, camping and fishing, which he still enjoys with his family!

Trent has an extensive educational background. After receiving his Associate's Degree from Northwest College, Trent received his Bachelor's Degree from BYU in Recreation Management. Luckily, Trent found his way, and received a Master of Business Administration Degree from Utah State University.

Trent worked in Logan City's Recreation Department until 2018, and he has spent the last five years working as the MBA Program Manager at Utah State University.

Trent enjoys a myriad of hobbies and activities, including reading a good book, performing in musical productions, traveling the world, and, spending time with his wife and their young son.

We are very excited to have Trent join our incredible Library! His vision and work ethic will help North Logan Library expand and fill the proposed Library Community Center with a wide variety of programming for all ages.

STREETS

We ask you to please keep in mind, that when snow is forecast, it is helpful when our citizens remove vehicles, trailers, garbage cans, etc. from the roadway. By doing this, our plow drivers are able to clear the *entire* road, which helps prevent bottlenecks, as well as damage to vehicles and property. We appreciate everyone's cooperation during our winter months! Thank you for your support!!

Also, when clearing the snow from your driveways, please remember **it is against the law** to push or blow it into the street, as it is a danger to drivers and plowers.

Please also be sure to clean the snow from the sidewalks in front of your home for the safety of the elderly, people in wheelchairs, and children trying to pass on their way to school. Thank you for your cooperation!

SNOW PLOWING ON CHRISTMAS DAY

Special thanks to the fastest, and most amazing snow plow crew in the world. We believe they deserve a break to be with their families. So, if we have a white Christmas, the plow crew will not start at their normal hour of 4 a.m. Instead they will start plowing around Noon on Christmas day.

STORMWATER

December is here and that means snow is coming. Here are a few reminders concerning snow and our storm drain system:

1. Do not pile snow on any storm drain, and keep the snow out of the curb and gutter.
2. Keep your snow on your property and don't pile it in the streets.
3. Avoid overusing ice melt to keep pollutants out of the storm drain system.

A few other reminders:

1. Leaves are still falling. Our city truck is out and about sweeping gutters. Please assist us in keeping leaves away from drains. Thanks for all your efforts already made.
2. As much as possible, keep any mud on your property and clean up after yourself if a mess is made.
3. Avoid storing materials or trash cans and other objects on the road for long periods. This will assist us with plowing and sweeping, and will help ensure a functioning storm drain system.

Thank you for your efforts and cooperation to help ensure we have a clean city!

HYDE PARK CEMETERY MAINTENANCE DISTRICT TAX

North Logan residents were finally removed from the Hyde Park Cemetery Maintenance District, effective in 2024. The bill you see from the county for the cemetery fee this year will be your last ever!

CITIZEN INPUT NEEDED! LEAD REDUCTION PROGRAM

The Environmental Protection Agency is requiring a full inventory of the water service line types for all properties in Utah, North Logan City included.

There are four primary service line/pipe materials types, which are shown below. North Logan City is largely certain that we do not have any lead service lines. We are required, however, to verify this information, and we need your help in identifying your home's water service line type. *We need everyone's input!* To aid in helping you identify your home's service line material type, please follow the following steps:

How to Identify Your Service Line Type:

Step 1: Locate where your service line enters your home. This is normally located in a utility or hot water heater room.

Step 2: Locate the test area. Find the water shut off valve and/or pressure reducer valve (PRV). The test area is located between the shutoff valve and the floor or exterior wall.

Step 3: The material type can be identified through a visual inspection, a scratch test, or magnet test. In some cases, the pipe can clearly be identified as plastic or copper. In other cases, due to corrosion, the pipe needs to be scratched to reveal a copper penny color, or silver color. If it is a silver color the only way to determine between galvanized or lead is a magnet test. Magnets will stick to galvanized but will not stick to lead.

Step 4: Take a picture of your test area, then submit your findings through the survey link.

You can use this QR code to be taken directly to the survey to follow the directions and submit your findings.

You can also go to the following link on our website to see a one-page sheet with all of the necessary information, including photos of service line types, at:

<https://northlogancity.org/wp-content/uploads/2023/11/Newsletter-Page-December.pdf>

There are also copies of this in our city office. If you would like to fill out a physical version of the survey, copies can also be picked up at the city office. Please return physical surveys back to the City Office, or email: water@northlogancity.org

We appreciate your help and cooperation with this!

WATER

Protecting your home's backflow assembly helps North Logan keep our drinking water protected. A broken backflow assembly could allow backflows to happen, which could contaminate our water system. Now that cold weather has arrived, be sure to have your culinary irrigation lines blown out. This will help keep your backflow assembly from freezing and breaking. We also recommend insulating your backflow assembly as an added level of protection.
